### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jason C. Chumney on 8/24/06.

The application has been amended as follows:

**Cancel claims 14-16, 18 and 24.**

### *Allowable Subject Matter*

Claims 21-23 and 25 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach a method of forming a thin-film magnetic recording medium comprising: forming a laminate for magnetic data recording on a nonmagnetic substrate, wherein the step of forming a laminate is a dry process in a vacuum atmosphere, forming a protective layer on the laminate, wherein the step of forming a protective layer is a dry process in a vacuum atmosphere, plasma etching the protective layer of wherein the plasma etching step is conducted in a vacuum and in a process gas mixture comprising an inert gas, an oxygen gas and a nitrogen gas and a gas selected from the group consisting of chlorine gas and a fluorine gas, wherein particles on the entire surface of the protective layer are removed to make a smooth surface, conducting the steps of forming a laminate, forming a protective layer, and plasma-etching continuously and forming a lubricant layer on the protective layer, thereby minimizing surface defects.

Chu et al. in view of Honda et al. fail to teach the gas mixture including an inert gas, an oxygen gas, a nitrogen gas and chlorine or fluorine gas may be used to remove particles from the entire surface of the protective layer of a thin-film magnetic recording medium. Honda et al teaches that both masking particles and protective layer particles are removed but does recite the claimed gas mixture. Chu et al.

Art Unit: 1763

teaches the claimed gas mixture, but fails to teach removing particles from the entire surface, using a Teflon masking material to protect selected portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
